## **AMENDMENTS TO THE CLAIMS**

- 1. (Currently Amended) Elastic bandage (1, 16)-with electrodes (9, 10, 11, 12; 19, 20, 21, 22)-spaced apart from one another for connection to an electric stimulation device (4), characterized in that the elastic region of the bandage (1, 16)-bearing the electrodes (9, 10, 11, 12; 19, 20, 21, 22)-is covered on its outside by a pocket (13, 23)-which is far less elastic than the elastic region and which contains a resilient cushion (14, 24)-as support for the electrodes (9, 10, 11, 12; 19, 20, 21, 22)-attached to the inside of the bandage (1, 16).
- 2. (Currently Amended) Bandage according to claim 1, **characterized in that** the stimulation device (4)—is attached to the electrodes (9, 10, 11, 12; 19, 20, 21, 22) by means of lead wires (5, 6, 7, 8; 17, 18, 19, 20), which are worked into the material of the bandage (1, 16) by designing a plurality of successive bending points.
- 3. (Currently Amended) Bandage according to claim 1—or—2, characterized in that the stimulation device (4)-is fastened to the bandage (1, 16)-in a detachable manner.
- 4. (Currently Amended) Bandage according to any one of claims 1 through 4 claim 1, characterized in that the resilient cushion (24) is filled with resilient foam.
- 5. (Currently Amended) Bandage according to any one of claims 1 through 4 claim 1, characterized in that the resilient cushion consists of an inflatable tube (14).

ار

6. (New) Bandage according to claim 2, characterized in that the stimulation device is fastened to the bandage in a detachable manner.

- 7. (New) Bandage according to claim 2, characterized in that the resilient cushion is filled with resilient foam.
- 8. (New) Bandage according to claim 3, characterized in that the resilient cushion is filled with resilient foam.
- 9. (New) Bandage according to claim 2, characterized in that the resilient cushion consists of an inflatable tube.
- 10. (New) Bandage according to claim 3, characterized in that the resilient cushion consists of an inflatable tube.
- 11. (New) Bandage according to claim 4, characterized in that the resilient cushion consists of an inflatable tube.
